FLEECEBACK

 **EPDM** ROOFING
SYSTEMS

Introducing the FleeceBACK 1.5m Roll

The ideal roofing solution.

Features and Benefits:

All the advantages of the 3m roll in an easier handling size 1.50m x 12.20m

Lightweight rolls (34kg)

34% fewer seams than Mod Bit

Greater puncture resistance than most modifieds

3" FAT™ provides quality, consistency and speed of installation

Not dependent on heat application

Full line of laborsaving accessories available

Choice of 3 different adhesive options to suit most applicators

Excellent recover option for existing asphalt-based roofs

Low or no VOC emissions

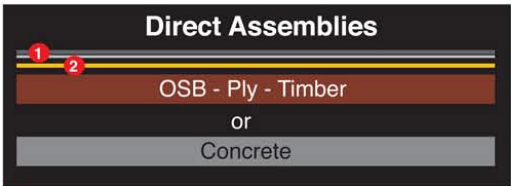

Added toughness and durability from fleece reinforcement

CARLISLE
Carlisle SynTec
