Roofing the world for over 50 years

Tea. It's the nation's favourite drink, now protected by RubberBond FleeceBack EPDM, some say the nation's favourite roofing system.

The Typhoon Tea factory on Merseyside has recently been reroofed by Wirral Roofcare Ltd., approved RubberBond Roofing contractors for 9 years.

They have recently received accolades as exceptional performers in seven categories for roofing in the United Kingdom. Wirral Roofcare were awarded the third most successful roofing company in the United Kingdom, in addition to being in the top 50 largest companies in the UK Roofing Contractors Industry.

The client had several prices from different roofing companies who proposed a range of high performance flat roofing systems. Wirral Roofcare Ltd. were able to offer RubberBond FleeceBack roofing system at the same price with twice the warranty, which ultimately won the contract.

The original waterproofing layer on the main stores was asphalt that had come

to the end of its serviceable life. The roof area of 3000 m² was undertaken by 4 approved installers and of course, was successfully completed within 4 weeks.

This is one of many roofing examples demonstrating the speed and ease that RubberBond FleeceBack roofing systems has been professionally installed. Offering superior product durability and long-term weather resistance, completed on time and on budget.

Since completing the initial flat roofing project, Typhoon Tea has had an additional area of 800m² reroofed using RubberBond EPDM over the main office block.
